MOVING BODY PROJECTORS

Alpha is the most complete line of moving body projectors on the market. It includes many projectors, which differ in power (from 300 to 1500 W) and in number of effects available, so that every operator can choose the most suitable model for his set. Brightness, projection quality, reliability, innovation, silence and ease of handling are the features that identify all the products in the range.

MOVING MIRROR PROJECTORS

In the Eighties Clay Paky made professional show lighting history thanks mainly to this class of products. Years go by, but the Clay Paky scanners, totally renewed in appearance and technologically, are still a reference standard, a synonym of quality, reliability, fantasy in producing effects and adaptability to any environment. The range includes Stage Scan, Golden Scan 4, Astroscan and the compact Mini Scan HP3.

COLOR CHANGERS

Clay Paky offers a vast choice of color changers with advanced performances. Suited to the most varied requirements, they are outstanding for the quality of the colors, achieved by using dichroic filters of great purity and brightness. The product range includes the CP Color line, designed for the professional and architectural market, which also includes specific models for exteriors, the Point intelligent micro-color changers, the Colorwave 300 "wash" color changer and the effects projector for outdoors Rain Spot 575.

DISPLAY LINE and other ARCHITECTURAL LIGHTING products

Display Line is a line of projectors for visual information, designed and produced by Clay Paky with a series of versatile models that are very simple to use and with an extremely large number of accessories in the catalogue, to communicate a brand, an image or a message in a bright, creative way. CP Spot is a range of mini-spots for general lighting of environments while the Water Column is the classic "welcome" effect for premises and points of sale.

FOLLOWSPOTS

Available in three versions, the Shadow followspots are offered by Clay Paky for theatres and live environments.

The Shadows are not limited to the classic followspot image, but offer a range of colors and effects that are of great use to the sets.
